### CALIFORNIA BRANCH OFFICE MANAGER (Job # 247)

Daniel B. Stephens & Associates, Inc. (DBS&A) is a progressive environmental science consulting firm, serving a broad spectrum of government and private sector clients, providing comprehensive services in groundwater and surface water hydrology, soil sciences, site assessment and remediation, and litigation support.

We are seeking a gifted manager and business developer, with proven client development capabilities in California, to lead our growth in the California marketplace. The individual in this position must have a 10-year track record combining relevant technical experience, client development, and staff and operations management. This position requires a BS degree, MS degree preferred, in geology, hydrology, or closely related area. Desirable areas of experience include vadose zone and groundwater hydrology, multi-phase contaminant transport, water resources analysis, including artificial recharge and groundwater resource management.

A high-energy individual with proven ability to handle multiple tasks and produce results in a fast-paced, competitive environment is required. Demonstrated success in developing strategies, establishing contacts, motivating teams, leading proposals and presenting solutions to clients are critical. Experience in strategic planning, development and execution of annual business plans, and budgeting and cost control is strongly preferred.

DBS&A offers challenging work, opportunities for professional development, and a competitive compensation and benefits package. For immediate consideration, please email (MS Word) resume with cover letter specifying Job #247, references, and salary history to: [hr@dbstephens.com](mailto:hr@dbstephens.com). Mail to: HR Director, Daniel B. Stephens & Associates, Inc., 6020 Academy Rd. NE Suite 100, Albuquerque, NM 87109.

### VICE PRESIDENT, WATER RESOURCES DIVISION (Job # 245)

Daniel B. Stephens & Associates, Inc. (DBS&A) is a progressive environmental science and engineering consulting firm, serving a broad spectrum of government and private sector clients, providing comprehensive services in groundwater and surface water hydrology, investigation and remediation of soil and groundwater, and water resource management.

This position may be based in either our Albuquerque, NM or Austin, TX location. We are seeking a highly skilled professional with at least 15 years of relevant surface- and/or groundwater experience, such as planning, feasibility, design and/or implementation of water resource management plans/projects. An MS degree in water resources, hydrology, hydrogeology, civil engineering or closely related field is preferred. PE or other professional licensure is a plus. VP is responsible for the profitability of the division; new business development; project management oversight; and mentoring and development of division staff.

The successful candidate will have proven ability to develop and execute work in the Southwest water resources market (NM, TX, CA, AZ), in areas such as municipal water supply development, groundwater modeling, and/or local or regional water supply planning. Proven expertise in business decision making, including development and implementation of strategic and tactical business plans; risk avoidance; interpretation and application of financial data to business decisions; and management of cost control are required.

DBS&A offers challenging work, opportunities for professional development, and a competitive compensation and benefits package. For immediate consideration, please e-mail (MSWord) resume with cover letter specifying Job #245, references and salary history to: [hr@dbstephens.com](mailto:hr@dbstephens.com). Mail to HR Director DBS&A, 6020 Academy Road NE, Albuquerque, NM 87109.
